

Duratec SF Manifold – MF10

Description:

Jenvey Dynamics are launching a Ford Duratec manifold for single bodies. This replaces the version (MF08) previously sold exclusively by SBD Motorsport.

The manifold length and straight port alignment have been maintained but we have made the following updates for MF10:

- Improved port shape – better match to the standard cylinder head inner port shape.
- Increased inlet bore size to match to 45mm parallel bodies or 51mm taper bodies.
- Material allowance to open inlet end out to 50mm.
- Reduced weight.
- ‘O’ ringed to cylinder head

Cost will be £160 + VAT

Available from Mid June after which MF08 will be discontinued.
