

CLS1 - LINKAGE KIT SINGLE

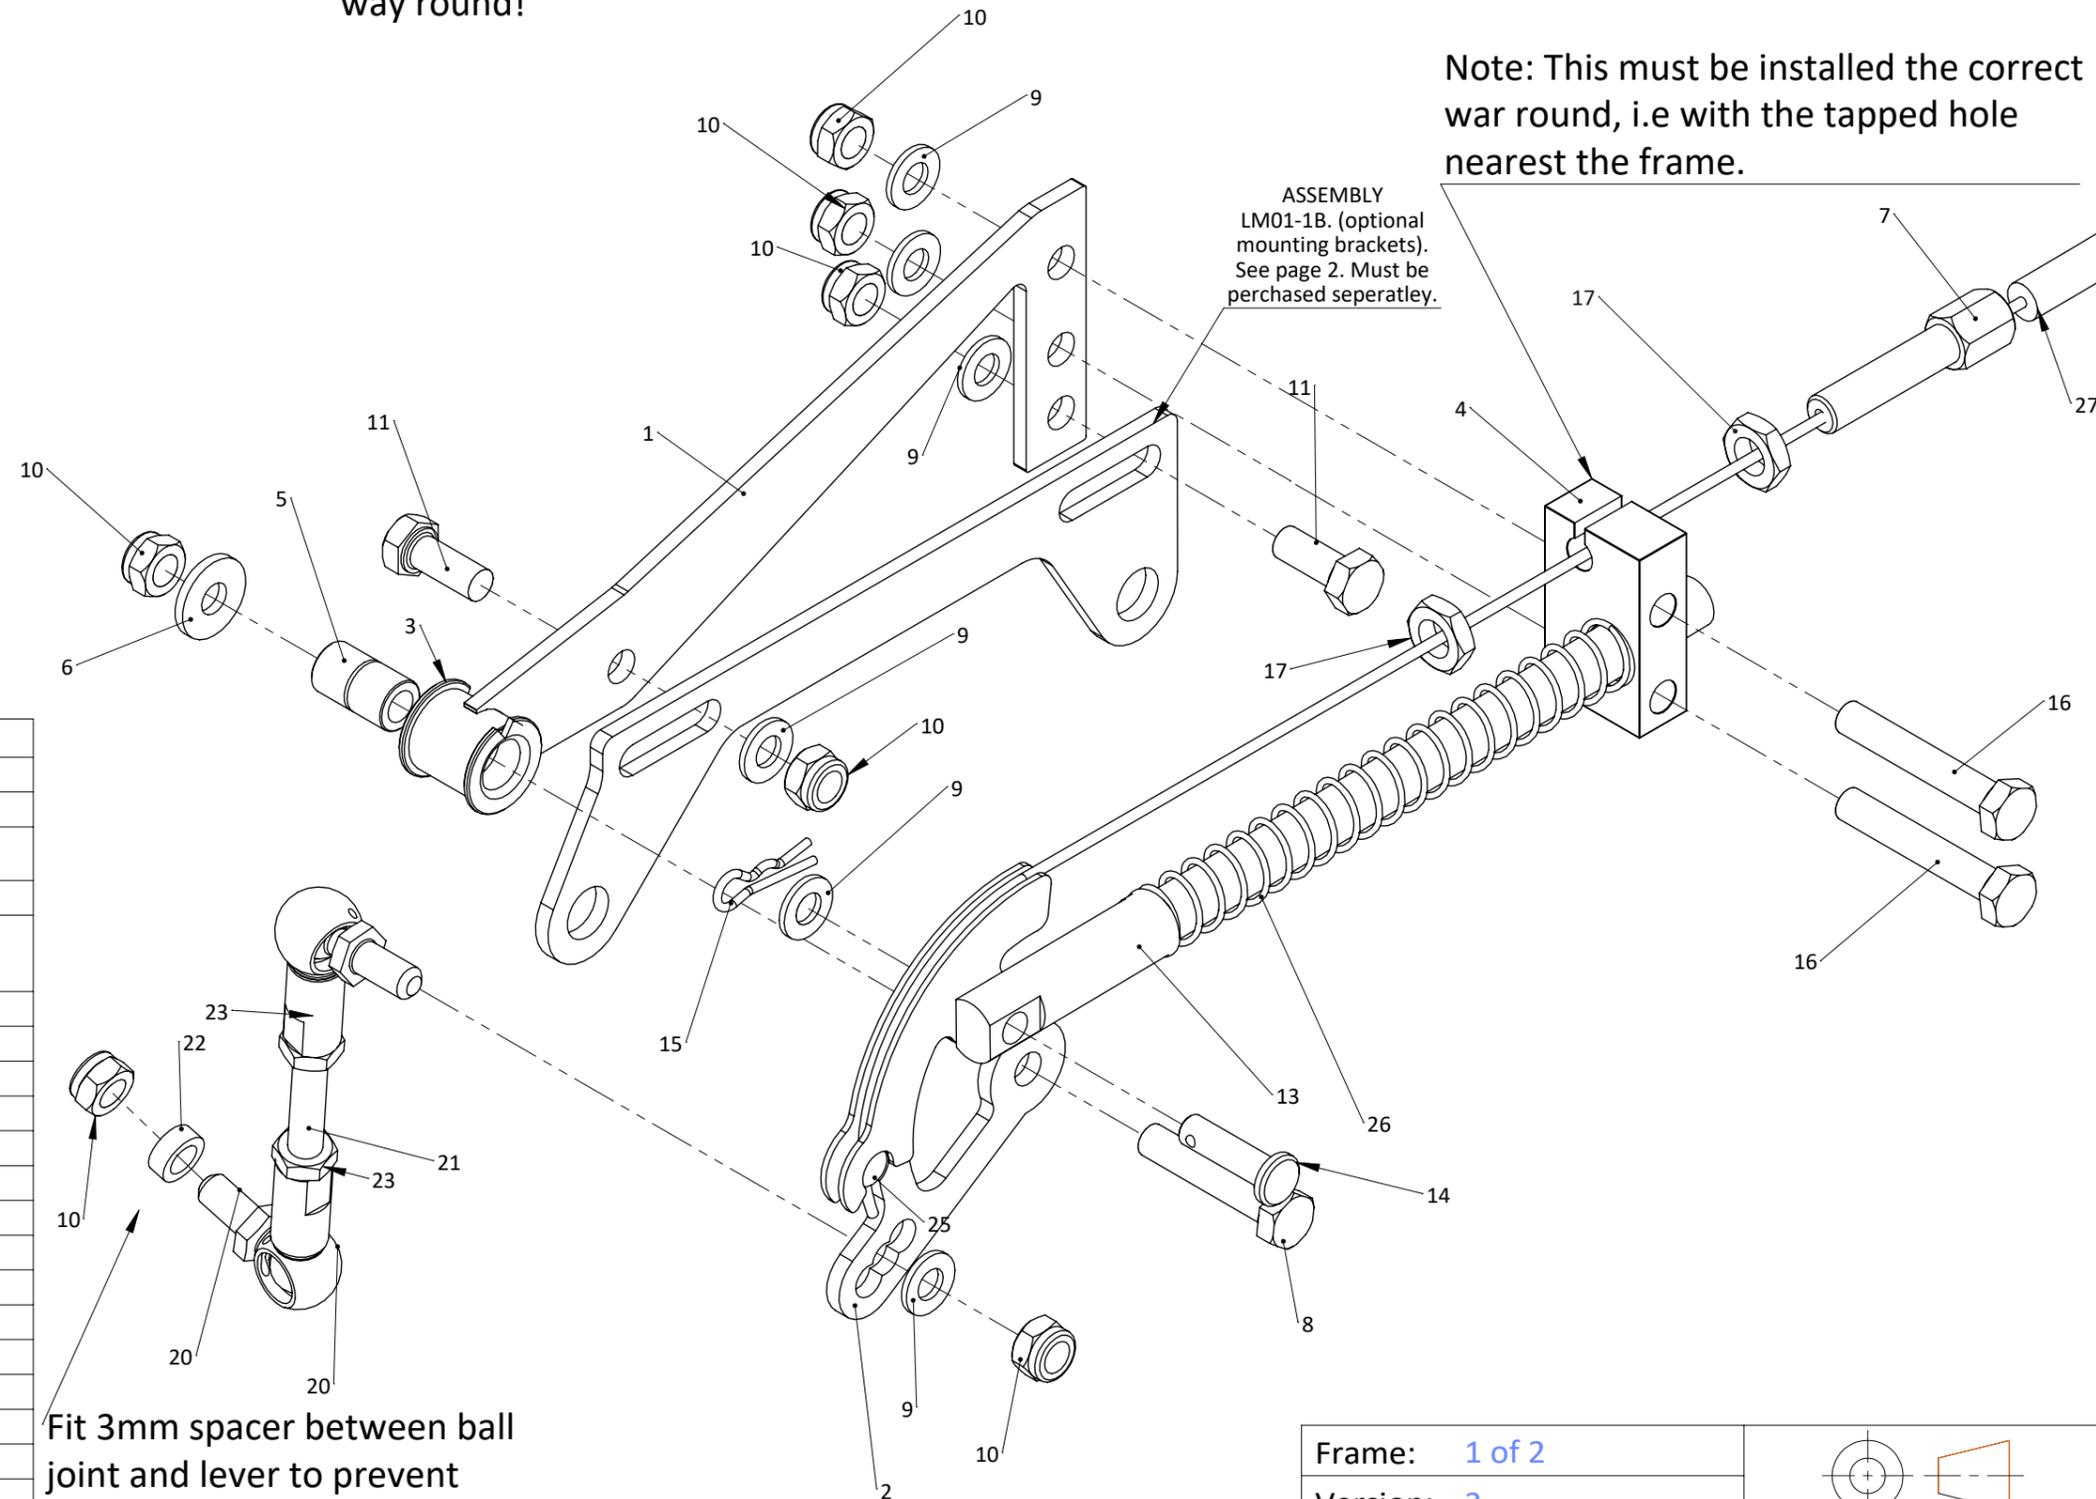

Engineered to win

Parts may be mirrored or moved to the opposite sides of their mountings to change the axial position of the final output.

Ensure that the spring mandrel is running perpendicular to the anchor block. If not, the anchor block is probably the wrong way round!

Note: This must be installed the correct way round, i.e. with the tapped hole nearest the frame.

ASSEMBLY LM01-1B. (optional mounting brackets). See page 2. Must be purchased separately.
