

REVIEW

“I have the #3 Datsun Spirit ITB setup, with the Jenvey Throttle Bodies at the heart of it. In fact, Eiji and I spent many hours over dinner discussing and designing the setup, and building the first two cars before mine. I am absolutely thrilled that this manifold is finally done, and can't wait to have it on my upcoming engine! (Perks of living near the shop, and using my car for R&D) I am thrilled about the new MAP provisions, and I love how it points the throttle bodies ever so slightly upward, staring you aggressively in the face! It's just hotness all around!”
